Notes	
-------	--

Targets: 1.049 OG, 1.012 FG, 34 IBU, 5 SRM.
 Mash in at 122F for 10 min, raise to 154F for 45+ min, mashout at 170F.
 Ferment at 50F until done, dry hop for 1 week, rack and lager for 4 weeks.
 Strike: 5.75 gal (~2.17 mash ratio), sparge: 4.4 gal
 Took about 15 mins to raise mash from 122F to 154F.
 Took about 10 mins to raise mash from 154F to 170F.
 Increased boil time by 5 mins to get target volume and OG.
 After cooling, did not pitch yeast until next day.
 9/6: dry hopped and raised temp to 60F.
 1.020 SG.
 9/13: great flavor and aroma; nice bitterness!

Yeast is very clumped but high; next time use the autosiphon.
 10/9: nice flavor and aroma with a little spice in the finish; I get that "pilsner" taste and slight aroma too.
 11/6: huge diacetyl aroma (seemed less earlier on and non-existent before lagering).
 Bottled some and dumped about a half gallon.
